

Templates inside Project

settings.py

Old Version Django 3.0:

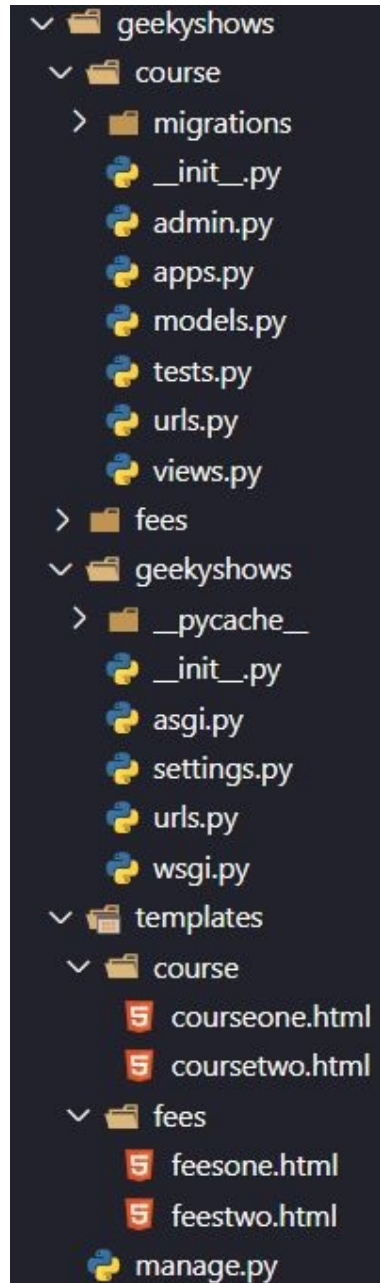

```
TEMPLATES_DIR = os.path.join(BASE_DIR, 'templates')
```

```
TEMPLATES_DIR = BASE_DIR / 'templates'
```

```
INSTALLED_APPS = [  
    'course',  
    'fees'  
]
```

```
TEMPLATES = [  
    {  
        'DIRS': [TEMPLATES_DIR],  
        'APP_DIRS': True,  
    }  
]
```

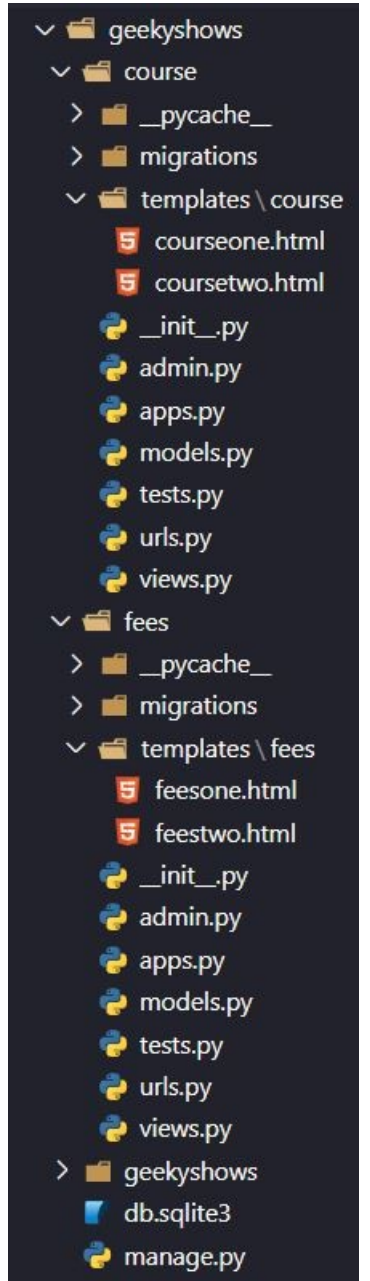

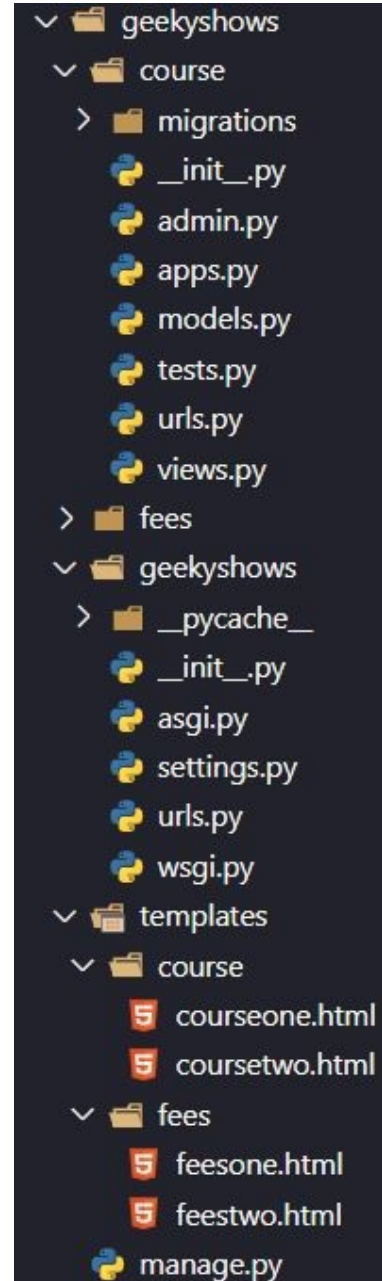

Django Version 3.1

Templates inside Application

settings.py

```
INSTALLED_APPS = [  
    'course',  
    'fees'  
]  
  
TEMPLATES = [  
    {  
        'DIRS': [ ],  
        'APP_DIRS': True,  
    }  
]
```

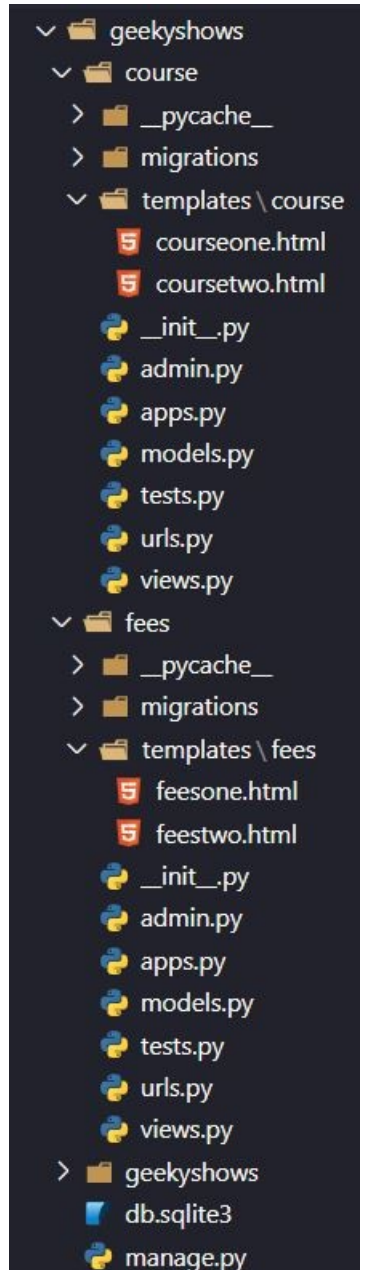

Geeky Steps

- Create Django Project: *django-admin startproject geekyshows*
- Create Django Application1: *python manage.py startapp course*
- Create Django Application2: *python manage.py startapp fees*
- Add/Install Applications to Django Project (course and fees to geekyshows) using settings.py INSTALLED_APPS
- Create **templates** folder inside each application
- Check 'APP_DIRS' : True in settings.py

```
TEMPLATES = [ { 'APP_DIRS' : True } ]
```

- Create **folder** inside **app/templates** directory for template files
- Create template files inside **app/templates/folder**
- Write View Function inside views.py file
- Define url for view function of application using urls.py file
- Write Template files code

settings.py

Old Version Django 3.0:

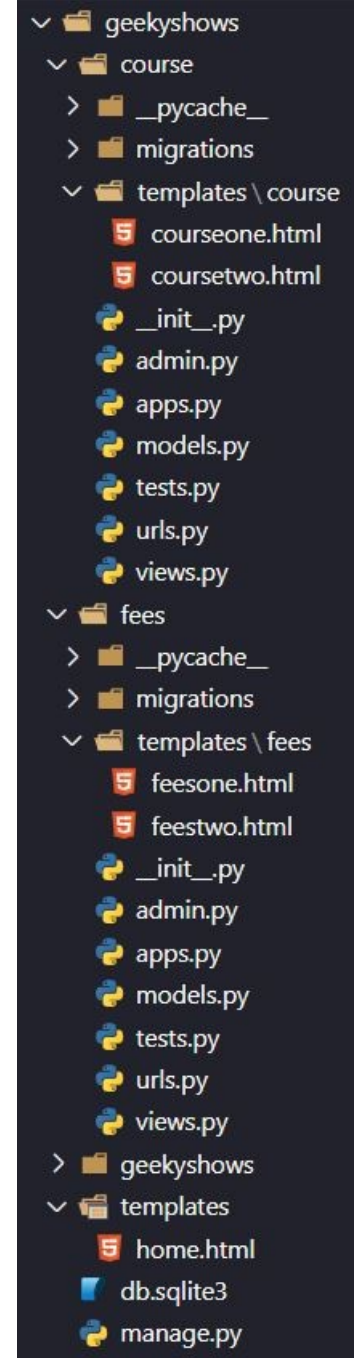

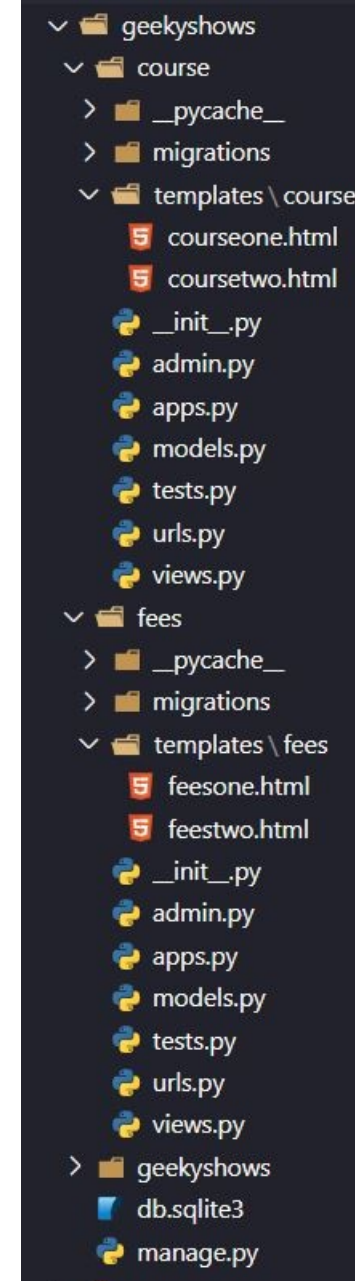

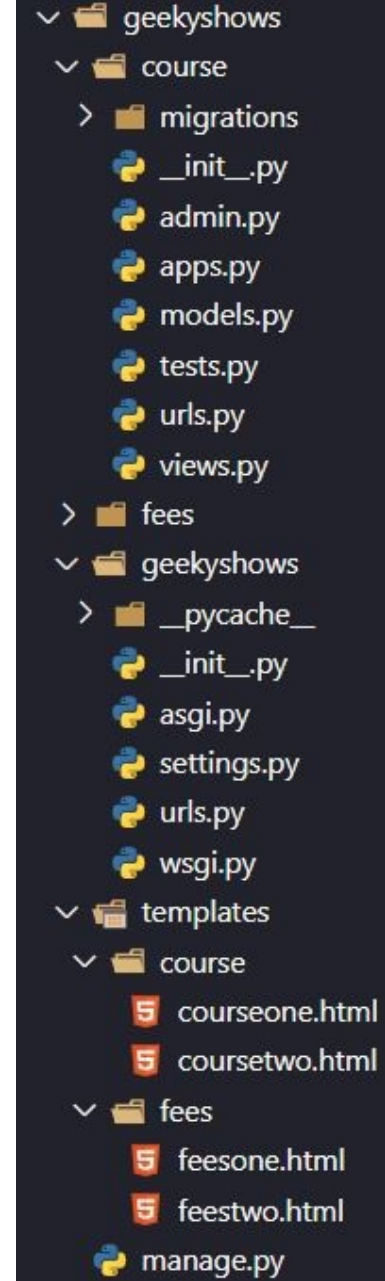

```
TEMPLATES_DIR = os.path.join(BASE_DIR, 'templates')
```

```
TEMPLATES_DIR = BASE_DIR / 'templates'
```

```
INSTALLED_APPS = [  
    'course',  
    'fees'  
]
```

```
TEMPLATES = [  
    {  
        'DIRS': [TEMPLATES_DIR],  
        'APP_DIRS': True,  
    }  
]
```

Django Version 3.1

Geeky Steps

- Create Django Project: *django-admin startproject geekyshows*
- Create Django Application1: *python manage.py startapp course*
- Create Django Application2: *python manage.py startapp fees*
- Add/Install Applications to Django Project (course and fees to geekyshows) using settings.py INSTALLED_APPS
- Create **templates** folder inside each application and inside Root Project Folder
- Check 'APP_DIRS' : True in settings.py

```
TEMPLATES = [ { 'APP_DIRS' : True } ]
```

- Add **templates** directory which is inside Root Project Folder, in settings.py

```
TEMPLATES_DIR = os.path.join(BASE_DIR, 'templates')
```

```
TEMPLATES_DIR = BASE_DIR / 'templates'
```

```
TEMPLATES = [ { 'DIRS': [TEMPLATES_DIR], } ]
```

- Create **folder** inside **app/templates** directory for template files
- Create template files inside **app/templates/folder**
- Create template files inside templates folder which is inside Root Project Folder
- Write View Function inside views.py file
- Define url for view function of application using urls.py file
- Write Template files code
